1. This opinion contains indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☒ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention

2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/IL04/00763

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
☐ This opinion has been established on the basis of a translation from the original language into the following language _____, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
 - a. type of material
☐ a sequence listing
☐ table(s) related to the sequence listing
 - b. format of material
☐ in written format
☐ in computer readable form
 - c. time of filing/furnishing
☐ contained in international application as filed.
☐ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4. Additional comments:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/IL04/00763

Box No. II Priority

1. ☒ The following document has not yet been furnished:

☒ copy of the earlier application whose priority has been claimed (Rules 43*bis*.1 and 66.7(a)).

☐ translation of the earlier application whose priority has been claimed (Rules 43*bis*.1 and 66.7(b)).

Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date is the claimed priority date.

2. ☐ This opinion has been established as if no priority has been claimed due to the fact that the priority claim has been found invalid (Rules 43*bis*.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.

3. Additional observations, if necessary:

In the event a copy of the non-US filed priority document is not furnished to this authority because the applicant fails to comply with PCT Rule 17.1 or the document is not available to this Authority from a digital library, the applicant is invited to provide this Authority with a copy of said document. The applicant is also invited to provide a translation of said document into English (if the document is not in English) within two months from the date of mailing of this written opinion. If this Authority is not provided with a copy of said non-US filed priority document and the applicant fails to comply with PCT Rule 17.1 and the priority document is not available to this Authority from a digital library and/or an English translation of said document, if it is not in English, is not provided to this Authority within the time period set forth above or by the time this Authority begins to draw up any written opinion (WO) of the International Preliminary Examining Authority (IPEA) or the International Preliminary Report on Patentability (IPRP) of the IPEA, any said WO or IPRP of the IPEA may be established as if the priority had not been claimed.

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/IL04/00763

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>Please See Continuation Sheet</u>	YES
	Claims <u>Please See Continuation Sheet</u>	NO
Inventive step (IS)	Claims <u>Please See Continuation Sheet</u>	YES
	Claims <u>Please See Continuation Sheet</u>	NO
Industrial applicability (IA)	Claims <u>Please See Continuation Sheet</u>	YES
	Claims <u>Please See Continuation Sheet</u>	NO

2. Citations and explanations:

Claims 1-10, 12-13, 15-23, 25-27, 31-32, 34-43, 45-46, 48-53, 55-56 and 60-61 lack novelty under PCT Article 33(2) as being anticipated by Dineff (WO 03/095998 A1).

Dineff discloses a method and system of detecting a concealed object by imparting IR radiation and taking images to measure a change in thermal emissivity from an object of interest that may contain contraband. Further he discloses using a IR radiation, reference images and changes in images to determine the presence of contraband objects that have been concealed.

Claims 11,24,28-30,44,54,57-59 lack an inventive step under PCT Article 33(3) as being obvious over Dineff (WO 03/095998 A1) in view of Huguenin et al (US Patent 5,227,800 A).

Dineff discloses a method and system of detecting a concealed object using IR radiation and comparing images, as disclosed above. Huguenin discloses imaging using visible radiation and further discloses using multiple sensors or cameras to simultaneously detect difference bands of radiation.

Claims 14,33,47 and 62 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest that if the concealed object is identified then the object is immobilized.

Claims 1-62 meet the criteria set out in PCT Article 33(4), and thus meet industrial applicability because the subject matter claimed can be made or used in industry.
